TGA#204-Alternative Assignment- “Build a Ziggurat”

Read pages 64-65 in your textbook, and Unit 3; Lesson 6 “A Ziggurat to the Gods” in the OLS

In ancient Samaria, Ziggurats were built to honor their Gods. Those Ziggurats often took hundreds of years and thousands of slaves to complete. For this assignment you are going to build your own Ziggurat. Below are a few links that will help you build your very own Ziggurat. However these links are just suggestions if you want to use different materials or technology that is fine, you or your learning coach will need to kmail me letting me know that you will be doing something different. I will need you fulfil a few requirements in order to complete this assignment.

Requirements

1. Images- I will need to see the different stages of your Ziggurat. For this portion I will need to see a minimum of six pictures that show your progress throughout the assignment. You can also use video to show your progress if you'd like.
2. Description of your Ziggurat- You will need to write a minimum of two paragraphs explaining how you built your Ziggurat. What material did you use? How did you design it? What were the steps you used? What worked? What didn't work?
3. Description of the real Ziggurats- You will need to write a minimum of one paragraph describing the Ziggurats of Ancient Sumer. How were they built? What did they look like? How tall and wide were they? Unit 3; Lesson 6 in the OLS and p.64-65 in your textbook will be terrific resources.
4. Have fun! - Most importantly try to have fun. Remember that this project doesn't have to be perfect. It's inevitable that at some point this project will frustrate you. If that happens just be thankful you weren't in charge of building one of the real ones.

Word and PowerPoint are two programs that will work well in presenting your pictures and paragraphs. Please feel free to contact me if have any questions.
